

KOELIS TRAINING COURSE: OPTIMIZE THE USE OF YOUR SYSTEM

Boost your skills and knowledge to deliver the best care for your patients.

KOELIS instructor-led training course is designed to guide you in the launch of your new activity.

Comprising one preliminary training and another one in a real environment, KOELIS course will make you gain practical experience and improve your patient workflow, ensuring quality and efficiency in every intervention.

THE PROGRAM INCLUDES 2 STAGES

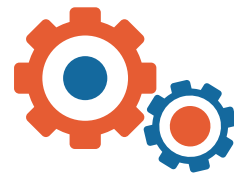

1 Preliminary training

Expand your knowledge on KOELIS technology for both transperineal and transrectal approaches.

Develop and practice the skills necessary to gain proficiency in using Trinity® system with a hands-on practice session on phantom. This course covers different scenarios from the image preparation and planning to the performance and registration of the exam.

2 Real-environment training

A practical session in a real-life scenario with the support of a KOELIS' application specialist. You will be assisted in as many patient cases as you wish in a day to gain total confidence on both transperineal and transrectal interventions.

Practical
Experience

Specialist Support

Transrectal and
Transperineal
interventions

"Health innovation as a passion"

KOELIS, The Prostate Care Company, has assisted urologists and radiologists from around the world in their routine clinical practice since 2006, providing the latest technology for personalized prostate cancer planning and management, from biopsy to active surveillance and treatment.

Focused on developing advanced, targeted and less invasive solutions, KOELIS is committed to creating and bringing to the market a new paradigm in prostate cancer care, where physicians can offer the most personalized answers to their patients, avoiding any under or overtreatment and preserving quality of life. Thanks to cutting-edge imaging tools like Trinity® cartographer, which combines multiple imaging modalities with full 3D ultrasound, any suspicious lesion is characterized in a detailed 3D prostate map, offering a comprehensive and multiparametric approach and enhancing diagnostic confidence.

The team at KOELIS innovates every day in collaboration with world-renowned universities and hospitals to offer physicians new advancements in imaging and a greater field of view, a must-have in active surveillance and targeted treatment. Based in Grenoble and Boston, KOELIS technology has been featured in more than 60 clinical publications and treats more than 250,000 patients worldwide, including patients in Europe, United States, Canada, Japan, Australia, South America and the Middle East.

KOELIS MAINTENANCE PROGRAMS: PROTECT THE VALUE OF YOUR INVESTMENT

We understand that the only thing more important than investing in technology is protecting that investment. KOELIS is committed to helping you save time, effort and money by providing you with a range of world-class maintenance programs.

Developed in response to customers’ needs, our tailored solutions cover yearly evolutive software upgrades and preventive visits, as well as the maintenance or replacement of the hardware and ultrasound components. Depending on the users’ needs, three offers are proposed: **SERENITY**, **COMFORT** and **ESSENTIAL**.

A COMPLETE PLAN FOR TOTAL PEACE OF MIND

Increased Software Performance

Time Saving

Reduced Maintenance Cost

High-level Support

AT KOELIS, WE CARE ABOUT YOUR TRUST AND SATISFACTION

KOELIS’ maintenance and service solutions have been designed with a focus on protection and prevention.

KOELIS comprehensive plans allow you to maximize equipment uptime needs and your budget thanks to high-level software and technical support offered by reliable experts.

A LEVEL OF COVERAGE ADAPTED TO YOUR TRINITY® SYSTEM

KOELIS has designed comprehensive and versatile maintenance programs to ensure the protection of your Trinity system. **SERENITY**, **COMFORT** and **ESSENTIAL** are three levels of solutions specifically tailored to suit your needs.

		SERENITY	COMFORT	ESSENTIAL
